www.thebrickstore.in

India's leading producer and exporter of Facing Bricks

Who we are?

In 1986, JJB - Jay Jalaram Brick Works was established with an intent to produce exceptional structural bricks for the Indian market. The quality and characteristics of bricks were greatly appreciated by architects and engineers. Interestingly, the construction fraternity experienced that JJB bricks were not only good as structural bricks but even better when used as facing bricks, given the appealing aesthetics and high quality. It led to the transformation of a small brickfield to emerge as India's largest manufacturer and exporter of clay facing products. Today, Jay Jalaram Brick Works presents India's widest range of clay Facing Bricks with 305+ brick variants of international quality in hundreds of shades, textures and formats.

Innovation meets Automation

We have focused on creating sustainable products that are produced in the most efficient way to have minimum impact on the environment without compromising on superior quality for buildings of the future. Our brick factory has advanced its manufacturing capabilities by equipment upgradation and automation. We take pride in being one of the first in the country to install the European extrusion line, drying chambers and world's most versatile hand simulated soft mud

line. The sophisticated preparation line with state-of-the-art recipe management systems have made Jay Jalaram Brick Works an innovative leader in clay brick manufacturing.

Brick Impressions

In the last 3 decades we have helped turn ideas and blueprints into welcoming classics that are appealing yet functional expressions of individuality. Our bricks have won the hearts of architects around the country and the world, time and again from IIM-Ahmedabad to hundreds of other architectural marvels that are bound to last a lifetime. JJB has successfully created many timeless facades.

International Presence

Our passion for creating a world-class product was rewarded when our quality was graciously appreciated by the international market. We have a strong presence in Europe, Oceania and GCC. Today we proudly export to almost 46 countries and counting. We continue to work relentlessly and passionately to cater high quality clay products all around the globe and give the market one of the finest bricks that they have been yearning for.

India's widest range of Facing Bricks

Traditional:

A range of genuinely handcrafted bricks, manufactured using the traditional technique of brick making.

Cladding:

Cladding brick is a genuine brick with a thinner profile ranging from 20 to 25mm thickness. Cladding brick achieves the desired appearance of a standard brick. This brick can be applied on any surface - plaster wall, ply, bison board, glass etc.

Linear:

With their peculiar dimensions - the length of more than ordinary bricks but only 50mm high, Linear bricks resemble ancient Roman Bricks and create a rustic and sophisticated look.

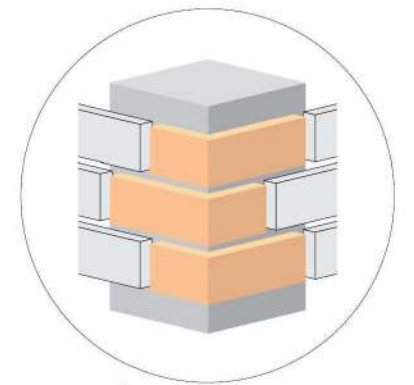

Extruded:

Manufactured by the world-renowned extrusion technology in our brick factory with the know-how from Europe, Extruded Bricks are visually pleasing and complemented by high strength.

Dutch Brick:

Inspired from the WAAL Format sized Brick of Netherland, Dutch Brick has a very linear profile, which appeals in contemporary forms.

L-Corner:

L corner Claddings are used with the brick cladding for any outward corners. They help to provide a seamless look by avoiding unwanted joinery, helping create the impression of an exposed brick wall.
